1. Error in Figure

In the original publication [1], there was a mistake in *Figure 1* as published. *In* the original publication, *Figure 1* only shows the study area of this paper and does not show the complete China Map. Therefore, for the academic rigor of the paper, we modify *Figure 1* to a complete map. The corrected *Figure 1* appears below.

Figure 1. Study area (data of Hong Kong, Macau and other regions are unobtainable).

The authors apologize for any inconvenience caused and state that the scientific conclusions are unaffected. The original publication has also been updated.
