A Corrigendum on

Surgical Treatments for Canine Anterior Cruciate Ligament Rupture: Assessing Functional Recovery Through Multibody Comparative Analysis

by Putame, G., Terzini, M., Bignardi, C., Beale, B., Hulse, D., and Zanetti, E., et al. (2019). Front. Bioeng. Biotechnol. 7:180. doi: 10.3389/fbioe.2019.00180

In the original article, there was an error. A Conflict of Interest Statement was missed.

A correction has been made to the Conflict of Interest section reporting the following detailed information:

DH and BB were chair and instructor, respectively, of CBLO courses in which Intrauma S.p.A. or Veterinary Orthopedic Implants (VOI) Inc. provided implants and instruments. However, they are not consultants for either company and did not promote sales neither receive royalties from the sale of Intrauma or VOI implants. The remaining authors declare that the research was conducted in the absence of any commercial or financial relationships that could be construed as a potential conflict of interest.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
