The selective tRNA aminoacylation mechanism based on a single G•U pair.

In Fig. 1b of our article “The selective tRNA aminoacylation mechanism based on a single G•U pair”, which shows the cloverleaf model of *A. fulgidus* tRNA^{Ala}, a U was inadvertently inserted after G15 in the D loop. A corrected panel is now provided. We thank Dr William McClain for bringing this to our attention. The original Article has not been corrected.

This figure shows the incorrect, published Fig. 1b (left panel) and the corrected Fig. 1b (right panel) of the original Article.
