

Income Statement for the year ended 31.12.2024			
£			
Revenue	150000	20000	170000
Cost of Sales	(85000)		(85000)
Gross Profit	65000		65000
Selling Expenses	(20000)		(20000)
Administration Expenses	(15000)		(15000)
Finance Expenses	(5000)		(5000)
Income Tax Expense		(15000)	(15000)
Profit Before Interest and Tax	25000		25000
Interest Expense		(10000)	(10000)
Profit After Interest and Tax	15000		15000
Income Tax Credit		(10000)	(10000)
Profit After Tax	5000		5000
Dividend Paid		(15000)	(15000)
Retained Profit		5000	5000
Profit Before Interest and Tax	25000		25000
Interest Expense		(10000)	(10000)
Income Tax Credit		(10000)	(10000)
Profit After Interest and Tax	15000		15000
Income Tax Expense		(10000)	(10000)
Profit Before Tax	5000		5000
Income Tax Credit		(10000)	(10000)
Profit After Tax		5000	5000
Dividend Paid		(15000)	(15000)
Retained Profit		5000	5000

The above figures are based on the assumption that the company has a profit before interest and tax of £25,000. This is the most likely scenario given the company's financial performance. The profit after interest and tax is £15,000, and the profit after tax is £5,000. The company has paid a dividend of £15,000, leaving a retained profit of £5,000.

The company's financial performance is strong, with a profit before interest and tax of £25,000. This is a significant improvement on the previous year's performance of £10,000. The company has also managed to reduce its interest expense from £15,000 to £10,000, which has helped to increase its profit after interest and tax to £15,000.

The company's profit after tax is £5,000, which is a significant improvement on the previous year's profit after tax of £2,000. This is due to the company's strong performance and its ability to reduce its interest expense.

The company has paid a dividend of £15,000, which is a significant increase on the previous year's dividend of £10,000. This is due to the company's strong performance and its ability to reduce its interest expense. The retained profit of £5,000 is also a significant improvement on the previous year's retained profit of £2,000.

that are associated with the health and well-being of older adults. The authors of this study suggest that the following factors are associated with the health and well-being of older adults:

1. The level of social support received by older adults.
2. The level of cognitive functioning of older adults.
3. The level of physical functioning of older adults.
4. The level of emotional functioning of older adults.
5. The level of financial resources of older adults.

Figure 1

Figure 1 illustrates the data visualization process. The grid shows a series of data points, with the highlighted cell representing a specific data point. The interface is designed to allow users to interact with the data, such as zooming in on specific points or filtering the data based on certain criteria.

The data visualization process involves several steps. First, the data is collected and organized into a structured format. This data is then processed and analyzed to identify patterns and trends. The results of this analysis are then presented in a visual format, such as a grid or a chart. This visual representation allows users to quickly and easily understand the data and make informed decisions based on the information presented.

The data visualization process is a critical component of data analysis. It allows users to see the data in a way that is easy to understand and interpret. This is particularly important when dealing with large amounts of data, as it allows users to quickly identify key trends and patterns. The visual representation of data also makes it easier to communicate the results of the analysis to others, as it provides a clear and concise way to present the information.

1. The following information is taken from the accounts of a company for the year ended 31 December 2017:

	£
Share capital	100,000
Reserves	150,000
Trade receivables	100,000
Trade payables	50,000
Property, plant and equipment	200,000
Intangible assets	50,000
Current tax liabilities	20,000
Current tax assets	10,000
Long-term debt	100,000
Long-term investments	50,000
Other non-current assets	50,000
Other non-current liabilities	50,000

Required: Calculate the company's net assets.

Solution

	£
Share capital	100,000
Reserves	150,000
Trade receivables	100,000
Trade payables	(50,000)
Property, plant and equipment	200,000
Intangible assets	50,000
Current tax liabilities	(20,000)
Current tax assets	10,000
Long-term debt	(100,000)
Long-term investments	50,000
Other non-current assets	50,000
Other non-current liabilities	(50,000)
Total	440,000

Net assets = £440,000 - £100,000 = £340,000

Question

1. The following information is taken from the accounts of a company for the year ended 31 December 2017:

	£
Share capital	100,000
Reserves	150,000
Trade receivables	100,000
Trade payables	50,000
Property, plant and equipment	200,000
Intangible assets	50,000
Current tax liabilities	20,000
Current tax assets	10,000
Long-term debt	100,000
Long-term investments	50,000
Other non-current assets	50,000
Other non-current liabilities	50,000
