

VCA in the Era of the COVID-19 Pandemic: Erratum

In the article “VCA in the Era of the COVID-19 Pandemic” by Petruzzo et al, which published in the April 2022 issue of *Transplantation*, an error was introduced on page 691 in the following sentence during typesetting: In the UET recipients, the immunosuppressive treatment was not modified, the rehabilitation therapy was performed in an in-patient basis and then they were vaccinated as soon as the vaccines fifth patient available in their countries. The correct sentence should read as: In the UET recipients, the immunosuppressive treatment was not modified, the rehabilitation therapy was performed in an in-patient basis and then they were vaccinated as soon as the vaccines became available in their countries.

The publisher apologizes for this error.
