

Figure S1. Detailed search strategy conducted on July 4, 2022. The bibliographic search was conducted using the OVID interface (Ovid Technologies, Inc), which provides access to online bibliographic databases in health sciences (Medline, Embase, Amed, Global Health). All the terms used are indicated (lines 1 to 78), as well as where in which paper the terms were searched (ab: abstract; hw: heading word; kw: keyword; ti: title; ot: original title; tn: trade name; dm: device manufacturer; mf: manufacturer; dv: device; kf: keyword heading; fx: subheading; dq: date qualification; cw: chemical words; nm: name of substance; ox: CAS registry number; px: pharmacologic action; rx: pharmacologic substances; ui: unique identifier; sy: systematic review; sh: subject heading; tx: full text; ct: clinical trial). How the searched terms were combined (lines 15, 26, 28 and 80) and the time limit (yr: year) (line 81) are also indicated.
