The Editors previously posted an Expression of Concern for this article regarding images in Supplemental 4B that appeared similar (Endo40 and Endo42 samples) and images in Supplemental Figure 9 that appeared to be the same (CH and CH/Endo28-NPs for heart tissue). No changes were necessary for Supplemental Figure 4B, as the Endo40 and Endo42 samples were determined to be derived from adjacent tumor sections. An institutional review committee concluded that the error in Supplemental Figure 9 was inadvertent and recommended correction. The authors provided the correct image for the CH/Endo28-NPs sample from the original study. An updated supplemental file that includes the correct version of Supplemental Figure 9 is now posted.

The authors regret the error.
