In “Trachoma Prevalence After Discontinuation of Mass Azithromycin Distribution [J Infect Dis. 2020 Feb 13, jiz691, <https://doi.org/10.1093/infdis/jiz691>]” by Godwin et al., the first sentence of the Results section includes a reference to “ITI database” that is incorrect and should read as “GET2020 Database”. In addition, the authors note that major contributors

to the GET2020 database include numerous Ministries of Health worldwide as well as the Global Trachoma Mapping Project (Solomon AW, Pavluck AL, Courtright P, et al. The Global Trachoma Mapping Project: Methodology of a 34-Country Population-Based Study. *Ophthalmic Epidemiol* 2015; 22(3):214–25). The authors regret the error.
