# Correction to: Fetal growth is associated with CpG methylation in the P2 promoter of the *IGF1* gene

Catherine Le Stunff<sup>1\*</sup>, Anne-Laure Castell<sup>2</sup>, Nicolas Todd<sup>1</sup>, Clémence Mille<sup>1</sup>, Marie-Pierre Belot<sup>1</sup>, Nathalie Frament<sup>1</sup>, Sylvie Brailly-Tabard<sup>3</sup>, Alexandra Benachi<sup>4</sup>, Delphine Fradin<sup>5</sup> and Pierre Bougnères<sup>1</sup>

## Correction

After publication of the original article [1], it came to the publishers' attention that the below author's corrections provided at the proofing stage had been misinterpreted.

- 1) The title should have read "Fetal growth is associated with CpG methylation in the P2 promoter of the *IGF1* gene", and not "Fetal growth is associated with the CpG methylation of the P2 promoter of the *IGF1* gene".
- 2) The first sentence of Fig. 1 caption should have read "CpG-137 methylation correlates negatively with **birth length**", and not "CpG-137 methylation correlates negatively with **height**".
- 3) Additional file 3 legend should have read "Correlation matrix of methylation values (%) at the **CpG** located in the P1 and P2 promoters of the *IGF1* gene in newborns patients. Pearson correlation coefficient is indicated in bold, and P value below", and not "Correlation matrix of methylation values (%) at the **CG** located in the P1 and P2 promoters of the *IGF1* gene in newborns patients. Pearson correlation coefficient is indicated in bold, and P value below."
- 4) Additional file 4 legend should have read "Relationship between promoter **CpG** methylation and genotypes. (A) Methylation at CpGs-137 of the *IGF1* P2 promoter is independent from the rs35767 genotypes. (B) Methylation at CpGs-206 and CpG-180 in insulin promoter is closely dependent on rs689 alleles.", and not "Relationship between promoter **CG** methylation and genotypes. (A) Methylation at CpGs-137 of the *IGF1* P2 promoter

is independent from the rs35767 genotypes. (B) Methylation at CpGs-206 and CpG-180 in insulin promoter is closely dependent on rs689 alleles."

The original article has been updated to reflect these corrections.
