Open Biol. **8**, 180131. (Published online 31 October 2018). (doi:10.1098/rsob.180131)

The p -value of significance test has been given as ' $p < 0.5$ ' in the Material and methods section (4.4), which is incorrect.

The correct writing for the p -value is ' $p < 0.05$ '. It should be noted that we correctly wrote the p -value in the electronic supplementary materials and in responding to the reviewers' comments, i.e. ' $p < 0.05$ '.

All the authors gave their consent to this correction.
