

Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.

Retraction—Family planning in COVID-19 times: access for all

In this invited Comment,¹ significant portions of text were used verbatim from several other pieces of published work without proper attribution. Although the sources were cited, the verbatim text should have been indicated by quotation marks. I therefore wish to retract this Comment. I sincerely regret the lapse.

I declare no competing interests
