Regional sub-projects undertaken as part of the global assessment efforts. The three main tasks in these projects (i) Red List assessor training; ii) data compilation and Red Listing assessment drafting; iii) and Red List assessment review occurred either **remotely** (i.e., species experts working online and individually on a task), during **virtual workshops** (i.e., a group of species experts and facilitator(s) meeting online to complete a task), and/or during regional **in-person workshops** (i.e., a group of species experts and facilitator(s) meeting in-person, normally within the region of interest, to complete a task).
