Author Correction: The AUTOTAC chemical biology platform for targeted protein degradation via the autophagy-lysosome system

Chang Hoon Ji, Hee Yeon Kim , Min Ju Lee, Ah Jung Heo, Daniel Youngjae Park, Sungsu Lim, Seulgi Shin, Srinivasrao Ganipiseti, Woo Seung Yang, Chang An Jung, Kun Young Kim, Eun Hye Jeong, Sun Ho Park, Su Bin Kim, Su Jin Lee, Jeong Eun Na, Ji In Kang , Hyung Min Chi, Hyun Tae Kim, Yun Kyung Kim , Bo Yeon Kim  & Yong Tae Kwon 

Correction to: *Nature Communications* <https://doi.org/10.1038/s41467-022-28520-4>, published online 16 February 2022.

The original version of this Article omitted from the author list the 8th author Srinivasrao Ganipiseti, who is from the University of Louisville. Consequently, Srinivasrao Ganipiseti's initials were added to the Competing Interests section, which now reads as follows: 'Seoul National University and AUTOTAC Bio, Inc. have filed patent applications (C.H.J., H.Y.K., M.J.L., A.J.H., S.G., J.E.N., H.T.K., and Y.T.K.; US 17/262,157 undergoing continuation-in-part, PCT/KR2019/009205 under examination; proof-of-concept AUTOTAC platform) based on the results of this study. The remaining authors declare no competing interests.' Additionally, Srinivasrao Ganipiseti's initials were added to the Author Contributions, and the corrected sentence reads as follows: 'ATLs binding the p62-ZZ domain were synthesized and modeled by S.G., K.Y.K., J.E.N., and H.T.K.' This has been corrected in both the PDF and HTML versions of the Article.
