

Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.

Contents lists available at [ScienceDirect](#)

Vaccine

Editorial

To our readers: Important notice

We are pleased to let you know that Elsevier, the publisher of *Vaccine*, has developed a new Access Program, which will provide free access to all of the content in selected Elsevier journals in the fields of vaccine research and virology. The program, which includes this journal, will run until the end of October.

As of this week, the full content (html and PDFs) of *Vaccine* will be made freely available on ScienceDirect through the [Elsevier Coronavirus Researcher Hub](#). This hub offers free access to a broad collection of resources and solutions for scientists whose work focuses on basic and clinical vaccine research, vaccine manufacturing, vaccine safety, and other vaccine-related research. Eligible researchers can apply for access at the [Hub](#). So far, more than 630 researchers have been granted access to the content of the Hub, and the site has received nearly 20,000 unique visitors.

Please note that the free access to the full content of these journals is in addition to the [ScienceDirect COVID-19 collection](#), which is currently offering free access to more than 30,000 Covid-19 related articles.

We are pleased to participate in this program and offer you, our readers and authors, this benefit. Please let us know how this benefitted you and share any comments you may have for improvement.

There is much science to do, and together we can advance the science in this difficult global pandemic.
