---

In the version of this article initially published, the third sentence of the abstract, now reading “This is a key question because single whole-genome duplication events such as cytokinesis failure can promote tumorigenesis<sup>9</sup> and DNA double-strand breaks<sup>10</sup>” was truncated and did not mention double-strand breaks or cite ref. 10 (Pedersen, R. S. et al. Profiling DNA damage response following mitotic perturbations. *Nat. Commun.* **7**, 13887 (2016)). The reference has now been included in the HTML and PDF versions of the article.
