

## Supplementary Figure 10

**Fig. S10** Effects of IAA on AR formation. Three-week-old plants grown in soil were artificially fallen down, as described in Figure 5, and IAA solutions (either 10 or 100 μM) were sprayed once a day for ten days. Three measurements of AR emergence, each consisting of sixteen plants, were statistically analyzed (*t*-test, \**P* < 0.01). Error bars indicate SE.
