Publisher Correction: Impaired photosynthesis and increased leaf construction costs may induce floral stress during episodes of global warming over macroevolutionary timescales

Matthew Haworth¹, Claire M. Belcher², Dilek Killi³, Rebecca A. Dewhurst², Alessandro Materassi⁴, Antonio Raschi⁴ & Mauro Centritto¹

Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-018-24459-z>, published online 18 April 2018

This Article contains an error in the legend of Figure 1.

“The box signifies the distribution of the 25–75% quartiles, the median is represented by a horizontal line within the box, horizontal bars either side of the box indicate minimum/maximum values. * indicates significant different between the 25 and 35 °C treatments at the 0.05 significance level.”

should read:

“The box signifies the distribution of the 25–75% quartiles, the median is represented by a horizontal line within the box, horizontal bars either side of the box indicate minimum/maximum values. * indicates significant different between the 25 and 35 °C treatments at the 0.05 significance level.”
