Age and Ageing, doi: [10.1093/ageing/afab182](https://doi.org/10.1093/ageing/afab182)

When this paper was first published, it contained reference 33, “Droz MM. Social regulation activities in end-of-life: a qualitative study on completion of advance directives in Swiss nursing homes. *BMC Palliat Care* 2020; 19: 57.” This reference should not have been included, and the point it was cited in the text should have referred to reference 16. This has now been corrected online: reference 33 has been deleted and subsequent references have been deleted.
