Dear authors:

Because of the contributions by XLY and LWD in the revision stage, we need to change the current manuscript's author order and addresses, as listed above.

Among the authors in the list, QSS designed experiments, offered direction and help on the whole project. LDD, XLY, WZD, HP, HCC and GQW conducted the experiments, analyzed the results. QSS and LDD performed bioinformatics analysis and drafted the manuscript. QSS and LWD reviewed the manuscript and made significant revisions on the drafts. All authors read and approved the final manuscript..

After consultations, all the authors agreed with the addition of authors in this paper, and all the authors agreed with the rearrangement of the names.

If everyone have no comments on the change of authorship of this manuscript, please email to me with "I agree to these changes".

Thank you very much for your attention, looking forward to your reply.

Best Wishes
