In the article titled “Mesenchymal Stem Cells Coated by the Extracellular Matrix Promote Wound Healing in Diabetic Rats” [1], due to a production error in Figure 2, the image of day 3 in the MSC group was duplicated to be for day 6 as well. The correct figure should be as follows:

Also, the name of the first author was given incorrectly as Linhao Wang. The author’s name should have been written as Linghao Wang. The revised authors’ list is shown above.

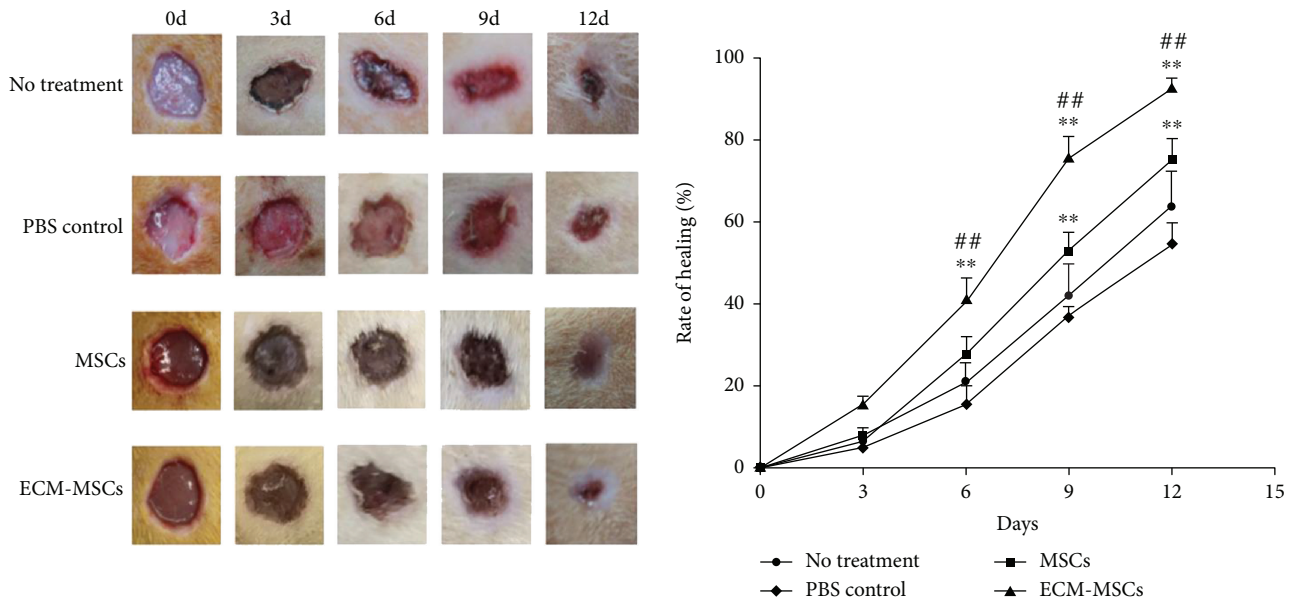

FIGURE 2: Wound healing at 0, 3, 6, 9, and 12 days for groups of no treatment, control, MSCs, and ECM-MSCs. The rate of healing was the percentage of the reduced wound area vs. the original wound area (%).  $n = 6$ ,  $**P < 0.01$  vs. the control group;  $##P < 0.01$  vs. the MSC group.
