Erratum to: Diabetes Ther (2015)  
DOI 10.1007/s13300-015-0098-Y

In Table 2, in the first column, the third row should read “60 to <90 by CKD-epi” and the fourth row should read “≥90 by CKD-epi” and in the fourth column the first row should read “≥90 by MDRD”.

**Table 2** The glomerular filtration rates of all subjects in Study 3 were estimated using both the 4-variable Modification of Diet in Renal Disease (MDRD) equation and the Chronic Kidney Disease Epidemiology Collaboration (CKD-epi) creatinine equation

Subject eGFR classification	<60 by MDRD	60 to <90 by MDRD	≥90 by MDRD	Total
<60 by CKD-epi	49 (4.7)	3 (0.3)	0 (0.0)	52 (5.0)
60 to <90 by CKD-epi	6 (0.6)	489 (47.2)	16 (1.5)	511 (49.4)
≥90 by CKD-epi	0 (0.0)	29 (2.8)	443 (42.8)	472 (45.6)
Total	55 (5.3)	521 (50.3)	459 (44.3)	1035 (100.0)

A comparison of the results of subject classification [*n* (%)] based on the results of each method is displayed
