Enzymatic- and temperature-sensitive controlled release of ultrasmall superparamagnetic iron oxides (USPIOs)

Shann S Yu^{1,2}, Randy L Scherer^{2,3}, Ryan A Ortega^{1,2}, Charleson S Bell^{1,2}, Conlin P O'Neil⁴, Jeffrey A Hubbell⁴ and Todd D Giorgio^{1,2*}

Correction

After publication of this work [1], we found an error in the figure legend for Figure two. In Figure 2A, GPC chromatograms of the synthesized co-polymers were shown, but the completed cPEG-PPS product contains some residual PPS-COOH, not H₂N-PEG-COOH as originally described in the figure legend.
