After publication of our article [1] the authors have notified us of missing to include one name to the authorship list:

“First, S. Bahrami has been involved in the process of our study from the beginning. Second, S. Bahrami worked very hard to achieve the economic part of the protocol - described in the method section ‘Cost-efficiency analysis’. For recall, an economic assessment is being developed in order to take into account the cost of both interventions in our study (MFT and SFT), to identify any possible difficulties in implementing both interventions, to evaluate all treatments and supports that caregivers of patients with eating disorders could for ... A cost-efficiency analysis will be conducted on the costs generated by the interventions with a perspective on their impact on patients’ health and families’ quality of life. This methodological choice results from the multi-dimensional consequences of the illness on the patients’ physical and psychiatric health and social integration, and on their families.”

With this addition, the Author’s contribution section is also modified to the below:

BC is the principal investigator of the study. NG is the scientific director of the study and co-investigator. JD is a co-investigator. CBa is the leading biostatistician. SB is in charge of the economic evaluation. NG, BC, JD, and LR designed the study in collaboration with CBI, MC, SB and MRM. JD and LR drafted the original version of the study protocol with the assistance of ASM, NG, VBC and BC. BC, IK, ZJ, and AH are therapists in SFT and MFT. All authors read and approved the final manuscript.
