The authors declare they have no competing interests.

Authors' contributions

TW created the concept and study design, performed all surgical and animal procedures, performed data analysis and interpretation, calculated statistics and drafted the article. PR Participated in the design of the study and performed all surgical animal procedures. YHC participated in the design of the study and revised the manuscript critically. MZ assisted in the surgical animal procedures, performed data management and prepared lung procurement for histological analysis. SK assisted in the surgical animal procedures, performed data management and prepared lung procurement for histological analysis. KN precipitated in the study concept and data analysis and revised the manuscript. AC, TP and AS performed the stereological analysis of the tissue samples and performed the statistical analysis. MO and CM created concept and design, participated in data analysis and revised the article. AS-K, MG, AM and FH participated in animal surgery and anesthesia, participated in data analysis and revised the manuscript. TWA approved the concept of the study and revised the manuscript. All authors approved the final version.
