Dear Readers,

In light of the rapid evolution of the Covid-19 pandemic, your editors have prioritized several recent (as of April 6, 2020) submissions including a review by your leadership (1) and a society article from the PORTO group of ESPGHAN (2) to highlight issues pertinent to providers caring for pediatric patients in this unusual environment. We hope you will find these articles informative and helpful. We do indeed recognize that the usefulness of these articles will be at the time they are published ahead of print (in early April), even though this print version appears in the June issue (the next available issue of JPGN available for publication).

Our thoughts are with you, your families, and your patients during this difficult period.

Mel Heyman MD

Dominique Belli, MD

Editors in Chief, *Journal of Pediatric Gastroenterology and Nutrition*

1. Murray KF, Gold BD, Shamir R, et al. COVID-19 and the Pediatric Gastroenterologist. *J Pediatr Gastroenterol Nutr* 2020;70:xx-xx.
2. Turner D, Huang Y, de-Carpi JM, et al. COVID-19 and paediatric inflammatory bowel diseases: global experience and provisional guidance (March 2020) from the Paediatric IBD Porto group of ESPGHAN. *J Pediatr Gastroenterol Nutr* 2020;70:xx-xx.
