### Correction to: Diabetologia

<https://doi.org/10.1007/s00125-021-05392-9>

The following sentence in the Discussion was inappropriately changed to a definite statement during editing: ‘Considering the mechanism of action of PB-119, which is similar to exenatide QW, PB-119 also showed superior efficacy compared with available OADs.’

The journal would like to revert back to the authors’ original phrasing as follows:

‘Considering the mechanism of action of PB-119, which is similar to exenatide QW, PB-119 could also reveal superior efficacy in comparison with available OADs.’

The original article has been corrected.
