

Supplementary Figure 1. *Inhibition of IL-13 - induced CLCA1 release by niclosamide and siRNA knockdown of ANO1 or ANO6.* Summary of CLCA1-release from CFBE human airway epithelial cells after incubation of the cells for 48 hrs with IL-13 (100 ng/ml). Cells were exposed to niclosamide (1 μ M) or scrambled RNA, siRNA-ANO1 or siRNA-ANO6 for 72 hrs #($p < 0.05$; unpaired t-test).
