Page 918. We noticed that [Figure 1a](#) in the published paper was inadvertently mislabeled (CTFE-e Li ion and NH-e Ag ion). The authors regret for this unintentional oversight and for any confusion that it has caused. We have provided the correct [Figure 1a](#). This correction does not affect the validity of the results and conclusions of the paper.

**Figure 1.** (a) SEM images of pure CTFE and NH thin film before and after SHI irradiation at  $5 \times 10^7$  ions/cm<sup>2</sup> fluence with two different (80 MeV Li<sup>3+</sup> and 120 MeV Ag<sup>11+</sup>) ions, followed by etching of the indicated specimens.
