The Authors and Editors wish to jointly publish an Expression of Concern regarding the above article.

The Editors wish to alert the readers that questions have been raised about the validity of some of the figures presented in this article. Figures 4 and 5 contain signs of splicing. As the laboratory that originally reported the work no longer exists, we are unable to request a more in-depth investigation of the original experiments. The Editors consider that this does not necessarily affect the validity of the results and the conclusions of the study, however we wish to alert our readership to these concerns.
