

Erratum to: Body Composition Changes after Initiation of Raltegravir or Protease Inhibitors: ACTG A5260s

An error appeared in the 1 April 2016 issue of the journal [McComsey GA, Moser C, Currier J, et al. Body Composition Changes after Initiation of Raltegravir or Protease Inhibitors: ACTG A5260s. *Clin Infect Dis* 2016;62(7):853–862. <https://doi.org/10.1093/cid/ciw017>]. Owing to a typographical error

in the labelling of monocyte subsets during data analysis, we regret that the original version of this article contained data related to the monocyte subsets that were published incorrectly. The data presented in Table 3 of the manuscript were revised accordingly.

In Table 3, “Baseline Associations With Percent Change in Body Composition Parameters”, the bottom three lines currently read:

% MNC: CD14+CD16+	-1.17 (-3.24, 0.91)	0.27	0.8 (-3.09, 4.68)	0.69	-0.16 (-0.49, 0.17)	0.34
% MNC: CD14(hi)CD16(hi)	-2.63 (-10.09, 4.82)	0.49	-0.25 (-13.53, 13.03)	0.97	-0.11 (-1.31, 1.10)	0.86
% MNC: CD14(low)CD16(hi)	-0.09 (-1.29, 1.12)	0.89	-1.38 (-3.52, 0.76)	0.21	-0.02 (-0.21, 0.18)	0.85

The bottom two lines of the revised table should correctly read

% MNC: CD14+CD16+	-0.72 (-3.68, 2.25)	0.64	0.61 (-4.70, 5.92)	0.82	-0.32 (-0.80, 0.17)	0.20
% MNC: CD14dimCD16+	-2.63 (-10.09, 4.82)	0.49	-0.25 (-13.53, 13.03)	0.97	-0.11 (-1.31, 1.10)	0.86

The details have been corrected only in this erratum to preserve the published version of record. The publisher regrets this error.
