The authors regret missing a few citations of the original inner-volume or zoomed gradient and spin-echo (GRASE) work. We would like to make the following corrections:

The third sentence of Abstract should be “Here we introduce a novel zoomed 3D gradient and spin-echo (GRASE) pseudo-continuous arterial spin labeling (pCASL) technique at 7T that offers the capability for quantitative measurements of laminar cerebral blood flow (CBF) both at rest and during task activation with high spatial specificity and sensitivity.”

The third sentence of section 2.1 should be “A segmented 3D inner-volume gradient and spin-echo (GRASE) sequence (Feinberg et al., 1985; Feinberg and Ramanna, 2015) was applied for zoomed pCASL perfusion imaging of a 3D slab of $100 \times 50 \times 24\text{mm}^3$ with a high resolution of isotropic 1mm^3 .”

The following two references should be included:
