

Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.

Thank you so much for your perfect journal and another great contribution. We have now received a message from our university mentioning my affiliation with another author. In that message, we were very seriously asked to change the affiliations as soon as possible,

otherwise the whole thesis and the main project will be rejected.

So we have changed the affiliations of the authors Sima Rafiei and Ahmad Ghashghaee.
