

Erratum

Erratum to: Reactive, Agentic, Apathetic, or Challenged? Aging, Emotion, and Coping During the COVID-19 Pandemic

Nathaniel A. Young, MA, Christian E. Waugh, PhD, Alyssa R. Minton, MS, Susan T. Charles, PhD, Claudia M. Haase, PhD, and Joseph A. Mikels, PhD

In the article “Reactive, Agentic, Apathetic, or Challenged? Aging, Emotion, and Coping During the COVID-19 Pandemic” [*The Gerontologist*, gnaa196, DOI: 10.1093/geront/gnaa196], requested author amendments to Table 2 were inadvertently omitted prior to publishing.

Table 2 has been updated as follows online:

Previous version

Table 2. ANCOVA Results for the Stress, Emotion, and Coping Measures by Age Group

Variable	Younger adults (N = 181)		Older adults (N = 176)		Test statistic		
	Mean	SD	Mean	SD	F(3, 336)	p	Cohen's f
PSS	1.77	0.76	1.14	0.74	83.8	<.001	0.50
Positive affect	1.63	0.80	1.47	0.78	0.388	.533	0.03
Negative affect	1.24	0.89	0.734	0.64	36.4	<.001	0.33
Problem-focused	2.26	0.66	2.36	0.63	5.73	.017	0.13
Emotion-focused	2.26	0.54	2.24	0.48	0.522	.470	0.04
Socially supported	2.11	0.57	1.87	0.62	18.6	<.001	0.24
Avoidant	1.84	0.61	1.45	0.34	32.0	<.001	0.31

Note: ANCOVA = analysis of covariance; PSS = Perceived Stress Scale.

Corrected version

Table 2. ANCOVA Results for the Stress, Emotion, and Coping Measures by Age Group

Variable	Younger adults (N = 181)		Older adults (N = 176)		Test statistic		
	Mean	SD	Mean	SD	F(3, 336)	p	Cohen's f
PSS	1.77	0.76	1.14	0.74	83.80	<.001	0.50
Positive affect	1.63	0.80	1.47	0.78	0.39	.533	0.03
Negative affect	1.24	0.89	0.734	0.64	36.40	<.001	0.33
Problem-focused	2.26	0.66	2.36	0.63	5.73	.017	0.13
Emotion-focused	2.26	0.54	2.24	0.48	0.52	.470	0.04
Socially supported	2.11	0.57	1.87	0.62	18.60	<.001	0.24
Avoidant	1.84	0.61	1.45	0.34	32.00	<.001	0.31

Note: ANCOVA = analysis of covariance; PSS = Perceived Stress Scale.

The publisher apologizes for the error.
