The original version of this article unfortunately contained mistakes in Table 1. In the part of “Tumor T stage”, the line “4”

showed “5 13”. But in fact it should be “13 5”. It does not affect the *P* value and the conclusion. The corrected Table 1 can be found below. The authors apologize for the error. The original article has been corrected.

**Table 1.** Association between clinicopathological parameters and OTUB2 expression ( $n = 90$ ).
