Corrigendum

Corrigendum to U.S. Population at Increased Risk of Severe Illness from COVID-19

Ezimamaka Ajufo, BM BCh^a, Shreya Rao, MD, MPH^{a,b}, Ann Marie Navar, MD, PhD^{a,b,c},
Ambarish Pandey, MD, MSCS^{a,b}, Colby R. Ayers, MS^{a,b}, Amit Khera, MD, MSc^{a,b,*}

^a Department of Internal Medicine, UT Southwestern Medical Center; Dallas, TX

^b Division of Cardiology, UT Southwestern Medical Center; Dallas, TX

^c Department of Clinical Sciences, UT Southwestern Medical Center; Dallas, TX

The authors regret an error made in the statement “6.2 million individuals (14.5%) had heart disease” and would like to replace this text with “14.5 million individuals (6.2% of the population) had heart disease”. This error appears in the Results section of the abstract and Results (third paragraph). In Figure 1, the authors would like to replace “n=6.2 million” in the legend with “n=14.5 million”. The attached PDF outlines these errors and the corresponding corrections. The authors would like to apologise for any inconvenience caused.
