

Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.

## Corrigendum

## Corrigendum to ‘Initial impact of the COVID-19 pandemic on college student mental health: A longitudinal examination of risk and protective factors’

The authors regret that an error has been identified in [Table 1](#). The number of participants  $\geq 10$  on the PHQ-9 at T3 (February 2020) is incorrectly listed as 75 (27.1%). The correct number of participants  $\geq 10$  on the PHQ-9 at T3 was 76, (37.1% of the sample). This correction does not change the study conclusions.

The authors would like to apologise for any inconvenience caused.

**Table 1**

Prevalence of Clinical Cutoff Scores Pre and Post COVID-19 Pandemic ( $n = 205$ ).

	Pre-Pandemic (T3)	Post-Pandemic (T4)
GAD-7 $\geq 10$	67 (32.7%)	105 (51.2%)
PHQ-9 $\geq 10$	76 (37.1%)	121 (59%)
Both GAD-7 and PHQ-9 $\geq 10$	56 (27.3%)	88 (42.9%)
Either GAD-7 or PHQ-9 $\geq 10$	87 (42.4%)	138 (67.3%)
PHQ-9 Item 9 $\geq 1$	51 (25.0%)	47 (22.9%)
PHQ-9 Impairment	46 (22.4%)	79 (38.5%)

T3: February 2020, T4: April 2020. PHQ-9 Item 9 scores  $\geq 1$  indicate report of suicidal ideation or thoughts of self-harm on at least several days in the past 2 weeks. PHQ-9 impairment scores  $\geq 2$  indicate significant impairment.
