

RETRACTION

Retraction: Predicting the impact of environmental factors on citrus canker through multiple regression

The *PLOS ONE* Editors

The *PLOS ONE* Editors retract this article [1] because it was identified as one of a series of submissions for which we have concerns about authorship, competing interests, and peer review. We regret that the issues were not addressed prior to the article's publication.

AH, MA, MY, MWA, HMZUG, and PV did not agree with the retraction. ZA, NAR, AR, SS, NL, KF, KT, SJ, SHS, and MJA either did not respond directly or could not be reached.
