

Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.

Correction

Neutralizing Antibodies against SARS-CoV-2 and Other Human Coronaviruses

(Trends in Immunology 41, 355–359; 2020)

In Figure 1A of the original online article, the authors identified an unintentional error in the orientation of S, E, and M proteins in the ER, ERGIC, and the Golgi. The authors have now corrected Figure 1A in the final published version. While this correction does not affect the discussion of the main text, the authors would like to apologize for this error and any confusion it may have caused readers.
