

Supplementary materials

Video 1. Human blastoids attach via the polar trophectoderm. Live imaging of human blastoids attached via the polar region to hormonally stimulated layers of endometrial epithelial cells, and challenged by pipetting liquid in their vicinity.

Video 2. Human blastoids on non-hormonally stimulated endometrial layers. Live imaging of human blastoids on non-hormonally stimulated layers of endometrial epithelial cells, and challenged by pipetting liquid in their vicinity. Blastoids do not show attachment.
