

An error appeared in the 15 June 2019 issue of the journal [Llenas-García J, Hurtado R, Lenghel F-O, et al. An Unusual Cause of Chronic Back Pain in a Migrant From Western Sahara. *Clin Infect Dis* 2019; 68 (12) 2131–34. <https://doi.org/10.1093/cid/ciy704>].

On page two, the Answer section, the Photo Quiz is incorrectly titled “An Unusual Finding During Robotic-Assisted

Laparoscopic Radical Prostatectomy.” The correct title for the Photo Quiz Answer is the same title as the Question title “An Unusual Cause of Chronic Back Pain in a Migrant From Western Sahara”. The publisher regrets this error.

DOI: 10.1093/cid/ciz587

The following error appeared in the corrected proof publication of this article [Achan J, Reuling IJ, Yap XZ, et al. Serologic Markers of Previous Malaria Exposure and Functional Antibodies Inhibiting Parasite Growth Are Associated With Parasite Kinetics Following a Plasmodium falciparum

Controlled Human Infection. *Clin Infect Dis* <https://doi.org/10.1093/cid/ciz740>].

In Figure 2, Image C, the x-axis currently has both labels as “sero-low” instead of one sero-low and the other as “sero-high”. The correct Figure 2 is below.

The author regrets this error.

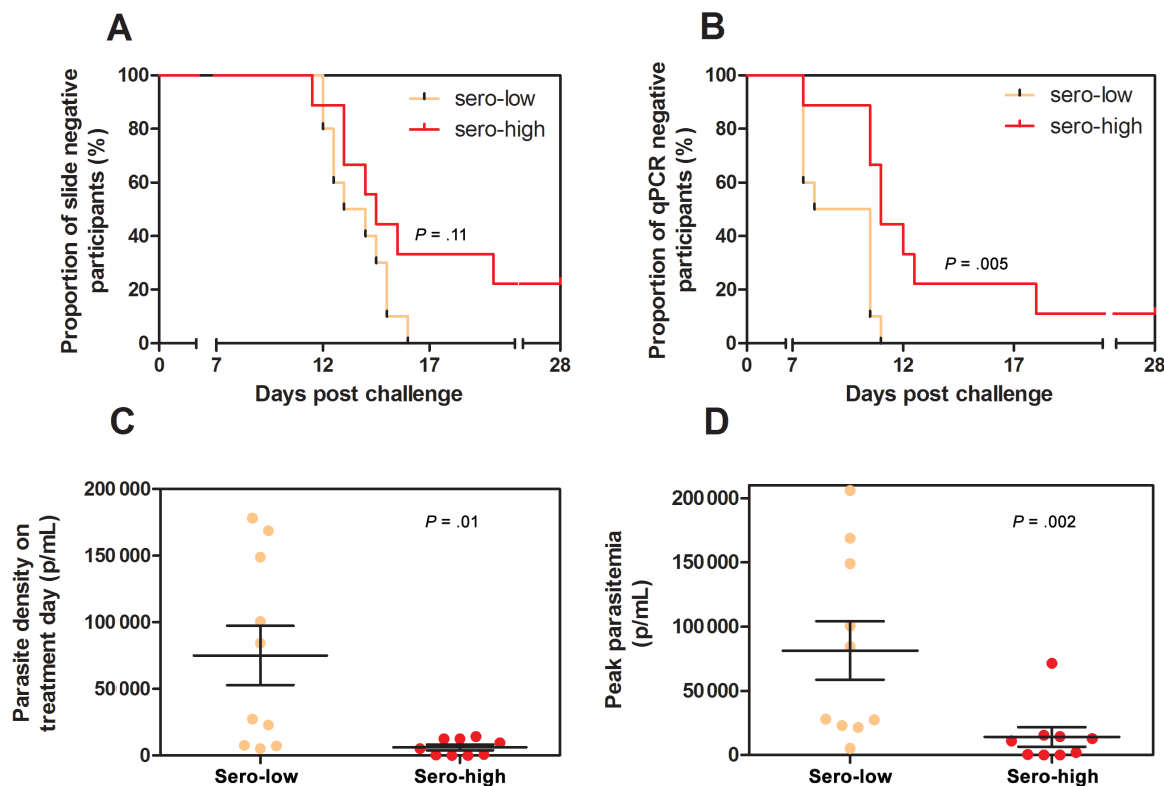

Figure 2. Comparison of parasite kinetics between the 2 exposure groups following controlled human malaria infection. Kaplan–Meier curve for time from inoculation to parasitemia detected by thick blood smear (A) and quantitative polymerase chain reaction (qPCR) (B). Differences in parasite density by qPCR at treatment (C) and peak parasitemia (D).
