

Supplementary Figure 1. Apoptosis induction in HL-60 cells. Apoptosis analysis of HL-60 cells 24 h after treatment with 1 μ M ATRA, 1 μ M MRT, or ATRA+MRT. Representative results of FITC-conjugated annexin V and PI staining from three independent experiments are shown here. Percentages of PI⁺ annexin V⁻, PI⁺ annexin V⁺, and PI⁻ annexin V⁺ cells among R1-gated cells were determined.
