Author Correction: Efficient derivation of knock-out and knock-in rats using embryos obtained by *in vitro* fertilization

Arata Honda, Ryoma Tachibana, Kazuya Hamada, Kohtaro Morita, Naoaki Mizuno, Kento Morita & Masahide Asano

Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-019-47964-1>, published online 09 August 2019

This Article contains errors in Table 5. The ‘No. of KI offspring (%)’ value is missing and the ‘No. of offspring with partial insertion (%)’ value should read “1 (5.3)” and not “9 (47.4)”. The correct Table 5 appears below as Table 1.

Target gene	No. of embryos electroporated	No. of embryos cultured with AAV	No. of embryos survived (%)	No. of embryos transferred	No. of offspring (%)	No. of KO offspring without GFP signal (%)	No. of offspring with GFP signal (%)	No. of KI offspring (%)	No. of offspring with partial insertion (%)	No. of offspring with random integration (%)
<i>Rosa 26</i>	376	366	349 (95.4)	180	19 (10.6)	7 (36.8)	12 (63.2)	9 (47.4)	1 (5.3)	2 (10.5)

Table 1. Knock-in efficiency of rat offspring after zygote genome editing using electroporation followed by AAV transduction.
