Author Correction: Hepatitis B, Hepatitis C, tuberculosis and sexually-transmitted infections among HIV positive patients in Kazakhstan

Ainur Mukhatayeva, Aidana Mustafa, Natalya Dzissyuk, Alpamys Issanov, Bayurzhan Bayserkin, Sten H. Vermund & Syed Ali

Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-021-92688-w>, published online 29 June 2021

The original version of this Article contained an error, where diagnostic tests for STI were omitted.

As a result, in the Materials and Methods section, now reads:

"For STIs, study participants were tested at regional or other clinics. In most cases, the following tests were used: For gonorrhoea, AmpliSens® Neisseria gonorrhoeae-Test-“FL (InterLabService, Moscow, Russia); for trichomoniasis, AmpliSens® Trichomonas vaginalis-Test-FL (InterLabService, Moscow, Russia), and for syphilis, Recomb-Best® Treponema pallidum-Summary antibodies Test (Vecor Best, Moscow, Russia)."

Additionally, p value is erroneously mentioned as $p=0.xx$ in the Results section under 'Co-infections among PLWH' subsection,

"On the other hand, in the multivariate model, the male sex was found to be a non-significant independent variable ($p=0.xx$), while being 30–39 years old at the time of HIV diagnosis (OR_{adj} 2.01; CI 1.02–3.93) was a risk factor for TB co-infection in addition to the 5–9 and 15–20 years of HIV infection (OR_{adj} 1.98; CI 1.15–3.40 and OR_{adj} 5.44; CI 1.99–14.82)."

now reads:

"On the other hand, in the multivariate model, the male sex was found to be a non-significant independent variable ($p=0.70$), while being 30–39 years old at the time of HIV diagnosis (OR_{adj} 2.01; CI 1.02–3.93) was a risk factor for TB co-infection in addition to the 5–9 and 15–20 years of HIV infection (OR_{adj} 1.98; CI 1.15–3.40 and OR_{adj} 5.44; CI 1.99–14.82)."

The original Article has been corrected.
