Incorrect Text

There was a small mistake in the sixth paragraph of the Discussion: the positions of two words (“positively” and “negatively”) should be exchanged. The correct expression [1] is “In addition, we also found that the education levels of the parents were positively associated with depression but negatively associated with both resilience and prosocial behavior.”

We apologize for any inconvenience caused to the readers by this mistake.

Funding: This work was supported by the Tianjin Program in philosophy and social sciences (TJJX19-008) and the poverty alleviation program of the Chinese Academy of Sciences (KFJ-FP-201,906).

Institutional Review Board Statement: The survey protocol was approved by the ethics review committee of the Institute of Psychology, Chinese Academy of Sciences (project identification code: H16014).

Informed Consent Statement: Informed consent was obtained from all participants involved in the study.

Conflicts of Interest: The authors declare that they have no conflicts of interest.
