Correction to: The Japanese version of the questionnaire about the process of recovery: development and validity and reliability testing

Akiko Kanehara^{1*†}, Risa Kotake^{2†}, Yuki Miyamoto³, Yousuke Kumakura³, Kentaro Morita¹, Tomoko Ishiura¹, Kimiko Shimizu⁴, Yumiko Fujieda⁴, Shuntaro Ando¹, Shinsuke Kondo¹ and Kiyoto Kasai¹

Correction to: *BMC Psychiatry*

<https://doi.org/10.1186/s12888-017-1520-y>

After publication of our article [1] we were notified that the 5-point Likert-type scale in Additional file 1 needs to change from “1 to 5” to “0 to 4”. The updated Additional file 1 is included in this correction.

In the original QPR (Neil et al., 2009), the scale ranged from 0 to 4. However, when the authors made the test version of the questionnaire form (in Japanese), it unintentionally became ranged from 1 to 5.
