

Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.

## Thank you to our peer reviewers in 2020

In 2020, the COVID-19 pandemic severely impacted neurological services and their patients, and the resulting heightened burden was felt by neurologists.<sup>1</sup> A year later, that impact is still being felt by many of our readers worldwide. Despite the undoubtedly difficult personal and professional pressures, our reviewers have continued to provide their constructive expert advice, enabling *The Lancet Neurology* to publish content that advocates change in and illuminates neurological clinical practice. The names of everyone who reviewed papers for the journal throughout 2020 are listed in the appendix; those who reviewed five papers, or more, are marked with an asterisk. We extend our warmest gratitude to all these reviewers.

As we look forward to 2022, we eagerly anticipate celebrating the 20-year anniversary

of *The Lancet Neurology*, which was launched in May 2002. As the world-leading clinical neurology journal, according to the 2020 Journal Citation Report,<sup>2</sup> *The Lancet Neurology* is uniquely placed to deliver the best neurological science for better lives. In our anniversary year, we shall be reflecting on progress in neurology over the past 20 years, the successes and challenges captured by *The Lancet Neurology*, and the goals for the journal for the next 20 years. Watch this space!
