Retraction to: *Cellular & Molecular Immunology* <https://doi.org/10.1038/s41423-020-0424-9>, published online 7 April 2020

The authors have retracted this article¹. After the publication of this article, it came to the authors attention that in order to support the conclusions of the study, the authors should have used primary T cells instead of T-cell lines. In addition, there are concerns that the flow cytometry methodology applied

here was flawed. These points resulted in the conclusions being considered invalid.

[All authors agree with this retraction]
